## SKILL

---

**Front End:** HTML,CSS,TAILWIND CSS,JAVASCRIPT,REACTJS,REDUX,NEXT JS

**Other's:** GIT & GITHUB

## WORK EXPERIENCE

---

### **Connect-Agency** - Dhaka,Bangladesh

Aug-2024 - Present

- Developed and maintained user-friendly web applications using React.js and Tailwind CSS.Collaborated closely with back-end developers to integrate APIs and ensure seamless functionality.Worked as part of a cross-functional team including designers and back-end engineers to deliver responsive and performant applications,while improving user experience and ensuring smooth integration of front-end and back-end systems.

## PROJECT

---

### **The Islamic Bd:** [Code](#) | [Live](#)

- Developed a user-friendly Qur'an web that offers easy access to the complete Qur'an with translations in Bengali and English.
- Implemented a robust search functionality to quickly locate surahs or ayahs, making the app useful for research and study purposes
- Integrated audio recitations of the Qur'an by well-known reciters, allowing users to listen to the verses while reading.

### **E-Commerce:** [Code](#) | [Live](#)

- Developed a full-featured e-commerce platform that allows users to browse products, add items to the cart, and complete purchases seamlessly.
- Designed a fully responsive layout using **React** and **CSS**, ensuring the website works smoothly across all devices, including mobiles and tablets

### **Expense-Tracker:** [Code](#) | [Live](#)

- Developed a fully functional expense tracking application that allows users to add, edit, and delete expenses, helping them manage their finances efficiently.
- Implemented real-time expense calculation and displayed a summary of total expenses, income, and savings to provide users with an overview of their financial situation .
- Used both local storage and Firebase for storing user data, ensuring that users can access their expense data even if they switch devices.

## EDUCATION

---

**Bogura Adarsha College, Bogura- HSC**
