## SKILL

---

**Front End:** HTML, CSS, TAILWIND CSS, JAVASCRIPT, REACTJS, REDUX, NEXT JS, Zustand, Framer Motion, Tanstack Query

**Other's:** GIT & GITHUB, Notion

## WORK EXPERIENCE

---

### **Connect-Agency** - Dhaka, Bangladesh (Remote)

Aug-2024 - Oct-2024

- Developed and maintained user-friendly web applications using React.js and Tailwind CSS. Collaborated closely with back-end developers to integrate APIs and ensure seamless functionality. Worked as part of a cross-functional team including designers and back-end engineers to deliver responsive and performant applications, while improving user experience and ensuring smooth integration of front-end and back-end systems.

### **Auroraxia-** Dhaka, Bangladesh (Remote)

Nov-2024-Present

I worked as a Front-End Developer Intern at Auroraxia Company for one month, where I contributed to a full-stack project. My primary responsibility was to develop and implement responsive user interfaces using React and Tailwind CSS, ensuring an optimal user experience across devices and browsers. I collaborated closely with the design team to translate mockups into functional web components and integrated RESTful APIs to display dynamic data effectively. Additionally, I worked with back-end developers to ensure seamless integration and functionality. Throughout the internship, I actively participated in daily stand-ups, provided updates on progress, and used Git for version control to manage project workflows efficiently. This experience allowed me to strengthen my skills in front-end development and teamwork within a professional environment.

## PROJECT

---

### **The Islamic BD:** [code](#) | [Live](#)

- Collaborated with a friend to create **The Islamic BD** website, focusing on Quranic learning and listening.
- Designed and developed the website using **React.js** for dynamic functionality and **Tailwind CSS** for responsive and modern styling.
- Integrated an API to include all **114 Surahs** of the Quran, allowing users to listen to the recitations seamlessly.
- Ensured a user-friendly interface, making navigation intuitive for users seeking Quranic content.
- Focused on delivering a smooth and engaging experience by optimizing performance and accessibility.

- Gained experience in building spiritually significant projects while enhancing technical skills in front-end development and API integration.

## RelifeMart [Live](#)

- Developed the **RelifeMart** e-commerce website during my internship at Auroraxia Company.
- Built a dynamic and responsive front-end using **React** and managed state efficiently with **Redux**.
- Utilized the **MERN stack** (MongoDB, Express.js, React, Node.js) for back-end development.
- Implemented key features such as user authentication, product listings, and a secure checkout process.
- Integrated APIs to handle real-time data updates and ensure a seamless shopping experience.
- Gained valuable experience in full-stack development by building a scalable and user-friendly web application.

## E-Commerce: [Code](#) | [Live](#)

- Developed a full-featured e-commerce platform that allows users to browse products, add items to the cart, and complete purchases seamlessly.
- Designed a fully responsive layout using **React** and **Tailwind CSS**, **Context Api** ensuring the website works smoothly across all devices, including mobiles and tablets

## EDUCATION

---

**Bogura Adarsha College, Bogura- HSC**

2022-2024

Result (pending)

Board: Rajshahi
